

Inclusion Training In Our School

Torbalı Piri Reis Vocational and Technical Anatolian High School

Erasmus+

* Current Situation:

- * All actions related with inclusion training are taken according to the regulations of The Ministry of Education.
- * There are 13 inclusion students in our school. Every class has one of them.
- * There is no education support room in our school due to insufficient space.
- * Because of this reason, inclusion students are trained in the classes with other students.

* Actions can be taken about inclusion students:

- * They can be encouraged to join social activities in order to increase their success in group studies.
- * With one-to-one contact, their problems can be detected and fixed earlier.
- * They can be given more responsibility in and out school activities in order to improve their initiative skills.
- * Their families can be invited to the school more frequently.
- * They can take Peer Education more often.

- * The school employees can get in contact with them in the same way as with other students, but employees should be informed about their special conditions and sensibilities.

Thanks for listening
