DIGITALIZATION AT SCHOOL

IN TURKEY

Emlakbank Süleyman Demirel Anadolu Lisesi

WHAT WE HAVE
EBA

- There is a network which is developed by the Education Ministry.It helps both teachers and students .Four years ago the government delivered tablets for teachers and students.

EBA

- We can use them while teaching subjects and solving problems, taking exams and extra information.It can be videos about subject to make the students understand easily.

- Each of them can reach or access this website easily. But the students aren't allowed to access the teachers' part.

E-TWINNING

- E-twinning is a portal to communicate with the other students and the teachers in the Europe. This year we have run three projects at our school. We have met new cultures and new friends while doing the tasks. This study made the students be windful. They will be sure what it is happening around the world.

İZMİR BİLİŞİM GÜNLERİ (DATA PROCESSING DAYS)

- This is a workshop site of İzmir Education center management. During the year all of the teachers can attend the join. Courses which consist of two or three hours a day. In these courses the teachers are taught new innovations about teaching by using digital equipments.

- DynEd is a software which is used to learn and improve English skills by the students. It guides both teachers and learners at every steps and levels.

SMART BOARDS AT OUR SCHOOL

- We have smart boards in all of the classes and also wifi. But you can't reach every websites. It's limited by the government. We use it for all of the lessons. The advantage of this we can manage the time and teach lots of things in a short time. We can post the questions about the subject. The students answer them at home. Later the teachers can mark them easily. Unfortunately we have some problems while using computers and smartboard efficiently. So it should be organised workshops for teachers regularly.

SUGGESSIONS

- After school teachers can give lectures by using network among the students. Without coming school the students can learn anything, anywhere. They can improve themselves.
- In our curriculum we have a course (digital literacy) which is chosen by the students.It's not compulsory. We can suggest it to the students.
- At the end of this year one of our teachers held an exhibition which consisted of the students' photographs. These were retouched by using digital technologies
- In music class , our teachers use the digital platform when they want the students to see how to use musical notes.
